Description

All the nutrients your turf could want, rolled into one: these single-compound micro-granules are easy to spread quickly and evenly, and feature our patented MU2 and SiLK coatings. Momentum contains NPK in a classic turf-friendly 4:1:2 ratio, with nitrogen and potassium in both standard-release and slow-release form, to feed your grass for up to 6 – 8 weeks. Also formulated with magnesium for a boost to color and trace elements for optimum health. Suitable for any area of fine turf and especially useful in the spring and summer when grass grows most actively.
