

PRODUCT INFORMATION:

SPORTSOAKER is a nonionic surfactant suitable for use in situations where water repellency inhibits or prevents the growth of turf. SPORTSOAKER is an economical treatment for use in irrigation systems and boom sprayers.

SPORTSOAKER improves penetration of water to highly water repellent soils and continues to achieve deep penetration even as it dilutes while watering in. Use with herbicides and fertilisers in turf is not recommended as it may increase the phytotoxicity of those chemicals. It is a wise precaution to test all mixtures before committing to large scale use.

MIXING:

SPORTSOAKER mixes easily with water and should be added directly to the spray tank after the loading of water or injected into the irrigation system.

CONDITIONS OF SALE:

The use of Sportsoaker is beyond the control of the manufacturer. Therefore, no warranty, expressed or implied, is given by K&B Adams Pty Ltd regarding suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not. K&B Adams Pty Ltd accepts no responsibility for any consequences whatsoever resulting from the use of this product.

SPORTSOAKER

FOR INJECTION SYSTEMS & BROADACRE USE

**A rapid penetrant for thorough vertical and lateral infiltration.
Maximises water efficiency from reduced evaporation, run off,
and enhances rewetting capability.**

100% NON IONIC SURFACTANTS

SUGGESTED APPLICATION RATE:

BOOM SPRAYERS

Tournament rate:

Fairways, playing fields -
20 - 50 L/Ha. Apply in at least 800 - 2000 Lts
water per Ha. Water in well immediately after
application. Apply monthly.

Standard rate: Parks & ovals -
3 - 7 L/Ha. Apply in 400 - 800 Lts water per
Ha. Follow normal irrigation schedule.
Apply monthly or as required.

BROADACRE USE & INJECTION IRRIGATION:

1 - 3 L/Ha per week. To improve
efficiency of applied water. Higher rate
gives best utilization of water. Apply as
required throughout the growing season.
SPORTSOAKER does not usually need
to be watered in following direct injection
application, however turf should be irrigated
before next mowing. If applied in very dry
conditions follow up with irrigation.

SAFETY PRECAUTIONS:

- Avoid contact with eyes
- Keep out of reach of children
- If swallowed seek medical advice
