

X-tra Wet

Quality Wetting Agent for use on all turf

Locally made for local conditions

Xtrawet is a quality Wetting Agent that has been used in the Recreational Turf Industry for many years. This product has been specifically designed for Australian conditions. Used at label rates, Xtrawet will increase water holding properties on all soil types, as well as assisting in drainage of excess water during heavy rainfall periods. Xtrawet is ideal for use on Golf Greens, Tees and Fairways, Sportsfields, Bowling Greens & General Turf areas.

Benefits:

- Improves water infiltration rate
- Ideal for re-wetting soils
- Mid to long term activity
- Safe on all turf types

Suggested application rate:

- Depending on the hydrophobic state of the soil, the required rate will vary
- For severe conditions, apply at 500 ml/100m² (50 Lt/Hectare)
- For moderate conditions, and ongoing maintenance, apply from 250 ml - 500 ml 100m² (25 - 50 Lt/Hectare)
- Apply evenly to target area in sufficient water to cover area
- Irrigate immediately after application to ensure product reaches the root zone depth
- Do not apply if temperature is over 30 degrees celsius

Minimum Analysis

100% Non Ionic Surfactants
